From the 2017 reviews of Time Management systems.

Designed specifically for accounting firms, TPS offers excellent practice management capability including a comprehensive time and billing function. TPS is best suited for small to mid-sized firms. Along with time and billing, TPS also offers excellent client management capability as well, providing users with the ability to categorize clients and prospects, as well as inactive clients.

TPS is installed on local computers, and there is an SQL version available for larger

While users can enter clients directly into TPS, the vendor suggests that importing a client list from Microsoft Outlook or QuickBooks is much easier. Data conversion services are available for those using other third-party applications.

TPS Time & Billing Software

www.tpssoftware.com

The latest version of TPS offers several updates and product enhancements including a streamlined updating process, an easier backup process, and enhanced calendar functionality. TPS offers multiple methods for entering time, with users able to simply enter time spent on a particular task, or use the stopwatch method which automatically tracks time until users choose to stop the timer.

The time entry screen in TPS provides users with the ability to enter time manually by selecting a client, engagement and work code, and then entering the correct amount of time. The screen below keeps a running total of all time entered for each day. The time entry screen also displays a Microsoft Outlook Calendar that provides a summary of time allocations. A stop watch time is also available in the time entry screen for users that wish to record time automatically.

TPS users Microsoft Word to create customer invoices, so the customization process is easy. The product also offers a wide variety of billing templates that can be utilized, depending on the type of billing desired. Billing types available include Quick Bill, Detail Bill, or Progress Bill. Users can bill work in progress (WIP) billing all, some, or none of the WIP.

When entries are ready for billing, managers can review a report that show the time entries by client, which can be utilized to determine what should and should not be

billed. There is also an option available to add markups and markdowns when

including current clients, inactive clients, and even prospects. Users also have access to more than 300 standard reports such as employee productivity reports, firm billing realization reports, profits on work performed reports, and top ten billings and even the firm's average collection period. For more comprehensive report customization, TPS also integrates with Crystal Reports. All TPS reports can be exported in a variety of formats including Microsoft Word and Excel, CSV, XML, RTF, and RPT. Users can also save all reports as a PDF if desired.

TPS now offers integration with Payclix, which allows firms to offer a quick, online payment method to their clients. The product also offers seamless integration with all Microsoft Office applications such as Word and Excel, using Word as the mechanism to create invoices and forms.

TPS offers solid help functionality from any screen in the application. The TPS website offers access to general FAQ's and users can also access product downloads, client training, and SQL downloads with a password that is supplied by TPS support. The TPS website also offers a variety of short demos that provide an overview of the product.
Toll free telephone support is available, and users can also access technical support via email directly from the website as desired.

TPS is well suited for small to mid-sized firms, though larger firms may find the in-depth billing capability useful as well. For firms with a large number of users, upgrading to the TPS SQL version will offer better performance. TPS is currently priced at $425.00 for the first seat, and $199.00 each for any subsequent seats. Firms should be aware that licensing is based on number of people that time is tracked for, not number of users.

2017 Overall Rating 4.75 Stars
