Rico forms including PRR-3, PRW-2, PRW-2C, and others. W-2/1099 Forms Filer supports up to 1,999 separate payers, and up to 99,999 employees per payer, making it a good choice for accounting firms that process a high number of returns for multiple clients each year.

The W-2/1099 Forms Filer form entry interface mirrors the form currently being processed, so data entry is quick and straight-forward. Users can also choose to import data from a variety of third-party applications including QuickBooks, Microsoft Excel, form print files, comma delimited text files, tab delimited text files, and columnar report files. The product will also create an SSN verification file that can verify social security numbers directly with the SSA.

W-2/1099 Forms Filer is designed to print using pre-printed forms, though an add-on module is available that allows users to print forms on blank paper. Firms can also create a PDF of all forms and later email the PDF file to clients, where they can print the forms in-house. E-filing is not automatically included in W-2/1099, though they can purchase E-Filer Services in order to electronically file all year-end compliance forms.

W-2/1099 Forms Filer serves as the core product for all AMS applications, and is required in order to run any of the other applications, which include Software Generated Forms, Advanced Micro Solutions Payroll, E-Filer, and Forms Filer Plus. The product can also be used as a stand-alone year-end compliance application as well.

All products can be accessed and downloaded directly from the AMS website, with users able to download product updates from the website as well. Customer support is available from the AMS website, with users able to access help and support resources such as the knowledge base and the FAQs. Users can also access instructions and publications for all supported forms, and the most current year's software

manual is available on the website as well. Telephone support is available during
