Be a Better Auditing Advisor: How Current Trends are Impacting the Auditing Process.

We've steamrolled ahead into the 21st century with mobile technology, Software as a Service, eCommerce, video streaming, cloud computing, and automated data entry – and we are constantly challenged to keep our processes up-to-date in order to accommodate these changes. The threat to data security is constant. Meanwhile, accountants are moving toward providing strategic advisory services and a customized experience to their clients. In this session, you'll learn how all of this fits with the service of providing audits and how accounting firms are restricting their audit processes to embrace these trends.
