applications such as SalesSeek, Capsule, eBridge Connections, Really Simple Systems,

**Management Features: 4.5 Stars**

Sage Business Cloud Accounting offers a variety of dashboards for system features such as Sales, Expenses, Cash Flow Statement and Cash Flow Forecast, with users able to easily customize the dashboards to display desired information. Information for all connected financial institutions can also be displayed, including current balance. Along with the dashboards, Sage Business Cloud Accounting offers good reporting capability, with an excellent selection of reports available including financial statements such as Profit and Loss, Balance Sheet, and Income Statement, as well as a Cash Flow Forecast, a Profit Analysis, a Sales Day Book, Sales Revenue, AR aging report, and an AP report. Reports offer little customization capability, but they can be exported as a CSV file for customizing if desired.

**Tech Issues: 4.75 Stars**

Sage Business Cloud Accounting offers good import and export capability, with users able to import data such as customer, vendor, and product lists directly into the application. Integration with a variety of third-party apps extend product functionality considerably, as does the available of the mobile apps. The application also offers an accountant's version of the application.

Sage Business Cloud Accounting offers easy help accessibility, with users able to access help from within all user interface screens. Searching the knowledgebase can be challenging as Sage uses one knowledgebase for all of its applications, making the process a bit more tedious than it should be. There is also an online community that users can join to ask or answer questions, or search for solutions to common problems. Various product training options are also available from Sage, and product support is available during regular business hours via email, with users able to create a support case from the website. A 24/7 chat option is available as well.
